

Notes:

Light animations to draw attention to certain areas, slide-in for the Call to Action jumbotron with a small effect on shopping-bag icon on load / addition to bag, to keep the user informed of their bag contents.

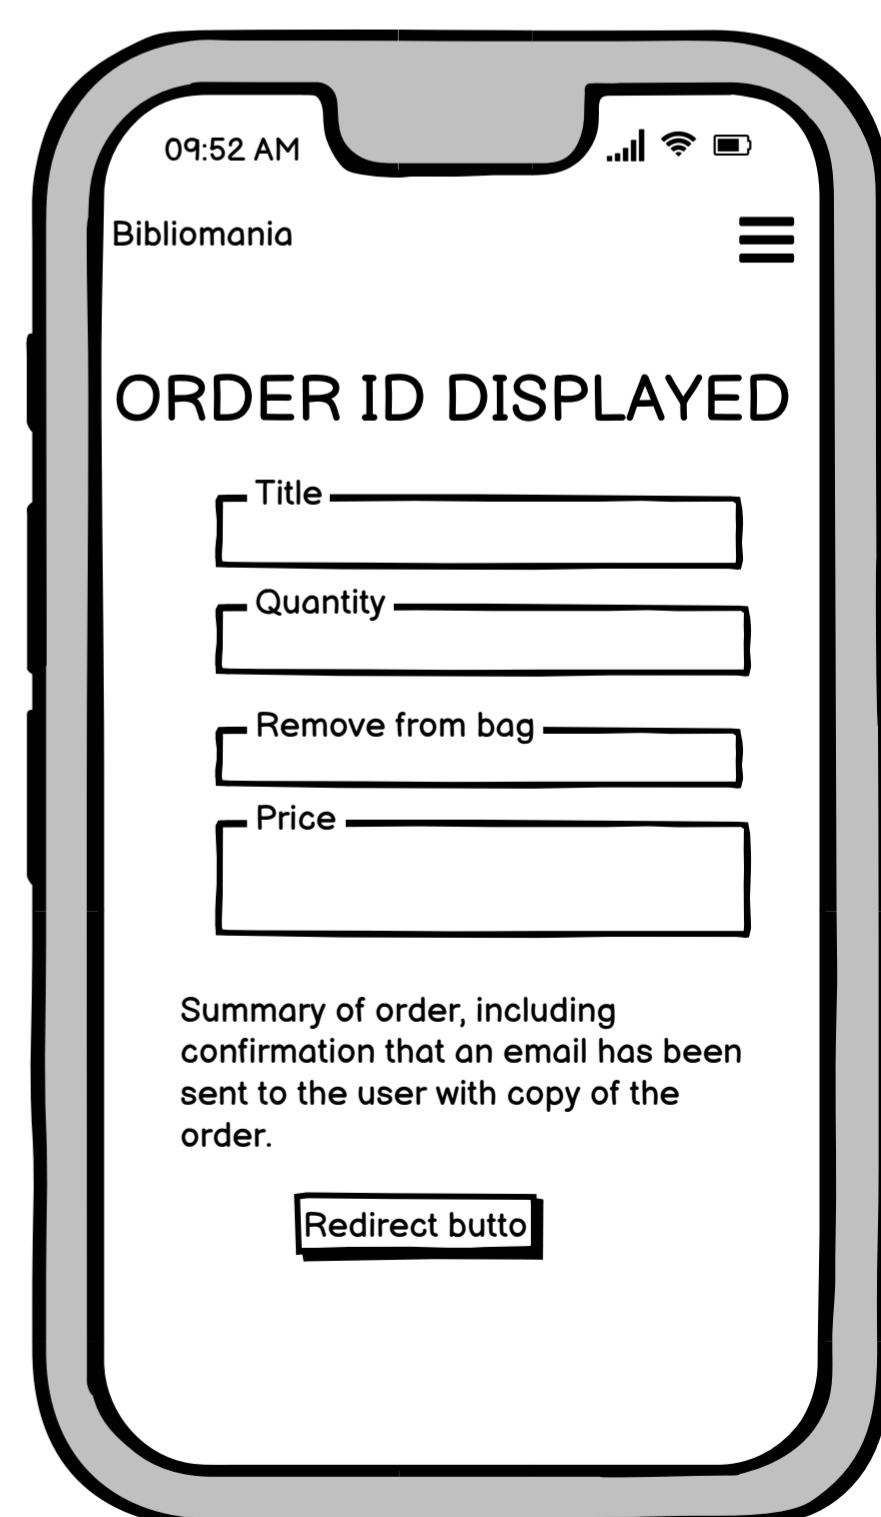

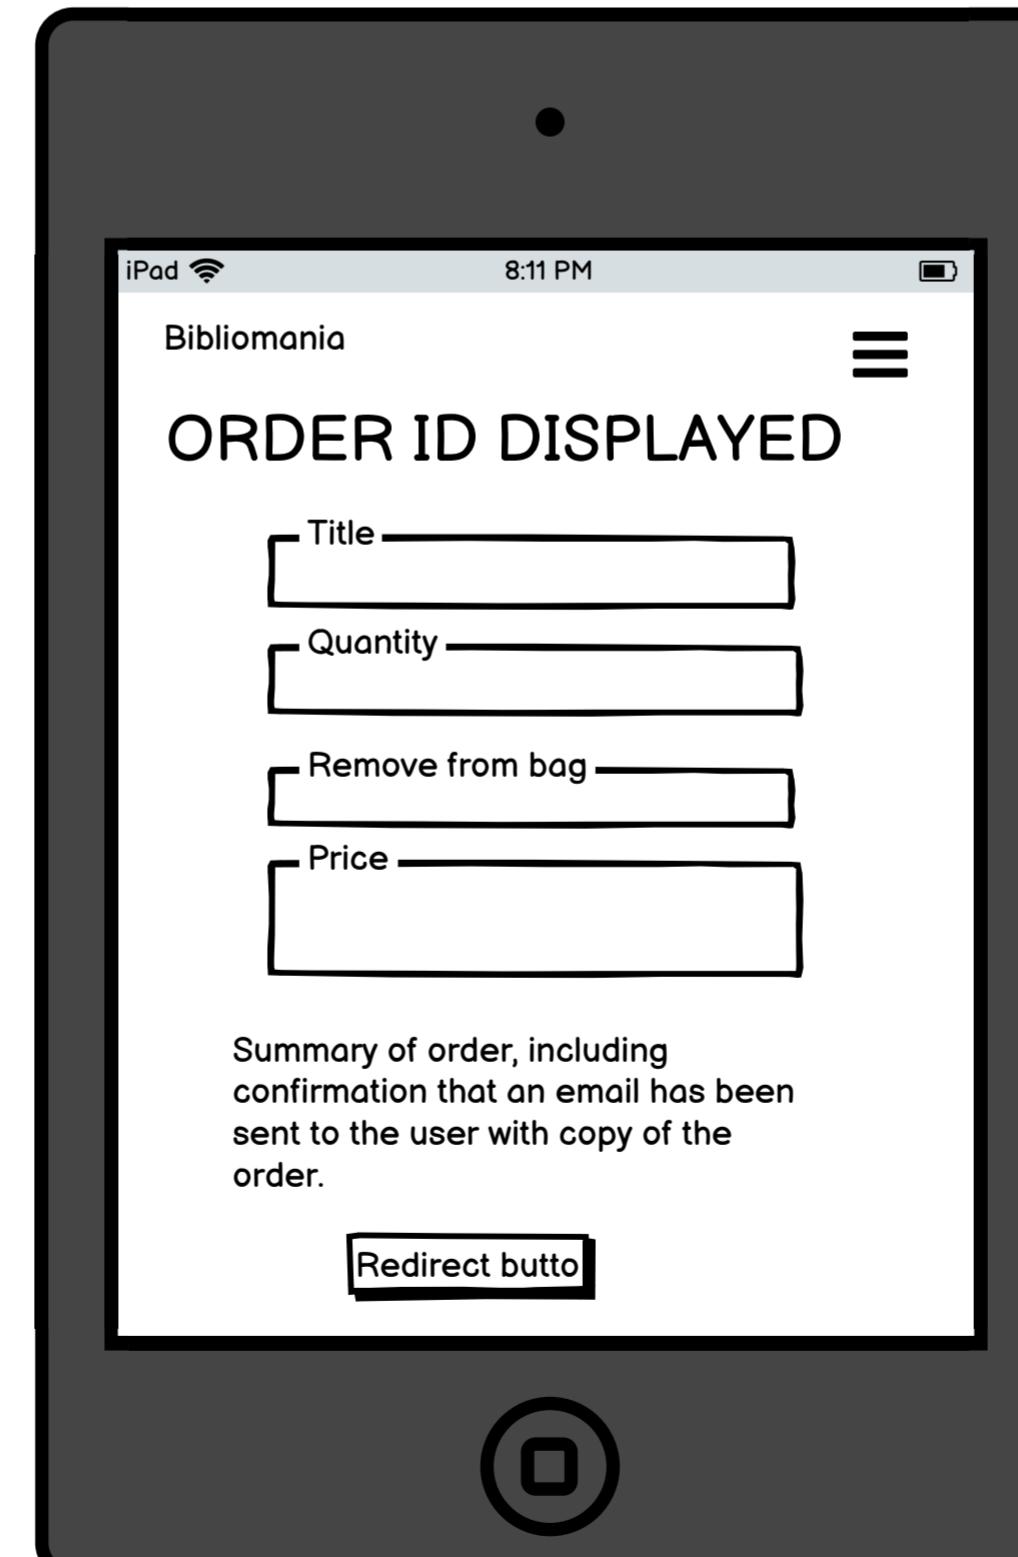

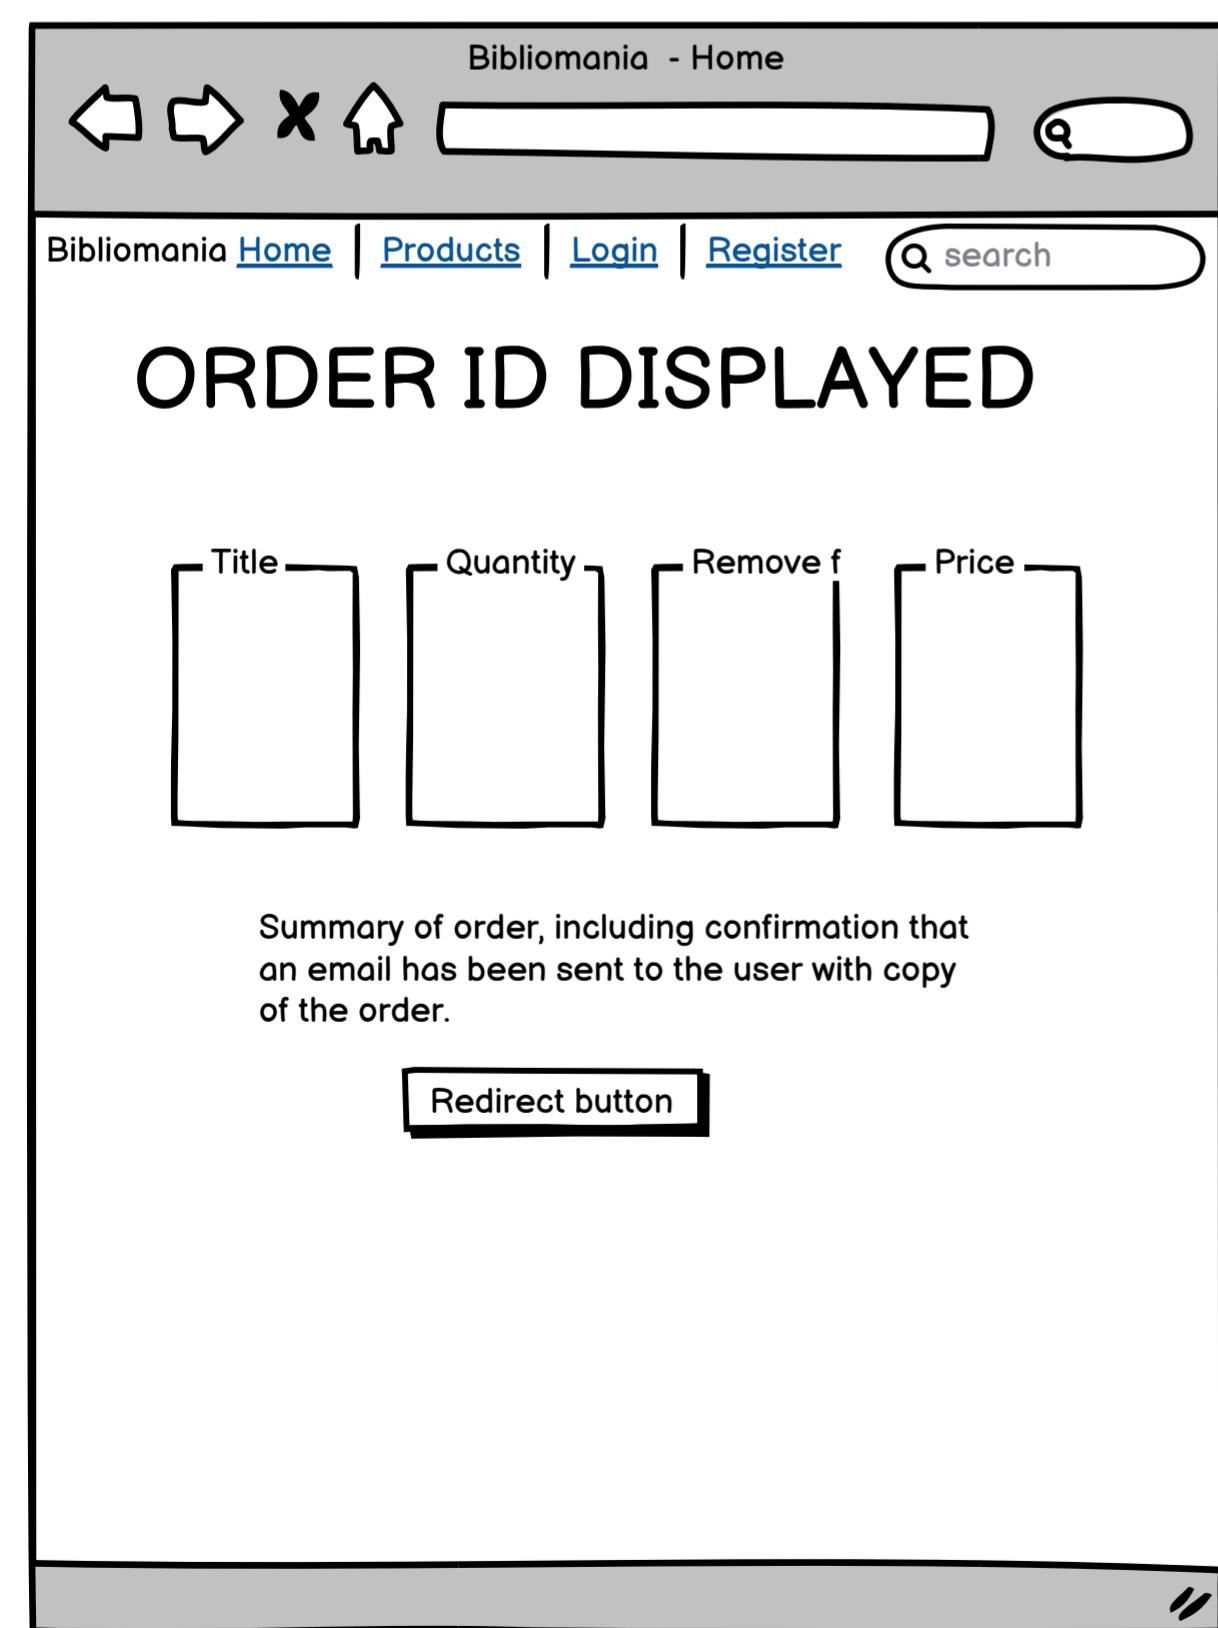

News items are located at the bottom of the page, but a context-link button in the jumbotron allows for quick linking. They are arranged in a grid-based bootstrap Deck for card elements. Only five are listed on the main page at any time, the rest become archived and available at the archive view.

Product_Info, the detail view for all products.

Dashboard

Product List and Order List views. Not pictured is a jQuery sorting plugin, allowing staff easy-access to all database objects. All items in the list have links to edit their contents in generic UpdateViews containing modelforms.
